AFS JANITORIAL HIRES PROPERTY MANAGER WITH 15 YEARS EXPERIENCE

TAMPA, Fla. (Dec. 16, 2010) –AFS Janitorial, a Tampa-based company that provides cleaning services for a range of commercial and residential high rise properties statewide, today announced the hiring of Tammy Roque as director of quality assurance. The staffing addition follows a series of acquisitions including Orlando-based USA Commercial Cleaners last month and Future Innovations Janitorial earlier this year.

Roque brings more than 15 years of experience as a property manager to her new role at AFS. Prior to signing on with AFS, Roque worked as property manager at Opus South Corporation, CLW, and most recently RMC Property Group where she was responsible for managing over 900,000 sq. ft. of industrial, retail and commercial Class A space. She brings an in-depth knowledge of facility operations and property manager/vendor relations. Roque will be responsible for overseeing quality assurance of operations in central and west coast Florida, as well as reporting of financial and market updates.

“Roque’s 17 years of experience in property management coupled with an interest in business administration made her an excellent addition to the team,” said Director of Operations Bryson Raver. “We are happy to have her on board and know our clients will benefit from her experience and insight.”

About AFS Janitorial

Headquartered in Tampa, Florida, AFS Janitorial combines 35 years of experience with a passion for the most current technologies and a focus on environmental initiatives, offering a vast range of janitorial solutions to clients of its four Florida locations. The company’s highly trained team of professionals provide service to a range of clients including: small business and professional offices, financial institutions, educational institutions, medical offices, commercial and high-rise buildings, industrial, construction cleaning, condominium and residential properties, hospitality and retail.
